RAMANATHAN G

Azure And DevOps Engineer

Bengaluru, India | gramak98@gmail.com | +917639363298

PROFESSIONAL SUMMARY:

Results-driven Cloud & DevOps Engineer with 4+ years of experience in **AWS** and **Azure** and **GCP**, scalable, secure infrastructure. Seeking a Technical Lead role to drive cloud strategy and DevOps excellence.specializing in Infrastructure as Code (IaC), CI/CD pipelines, and cloud-native solutions. Skilled in Jenkins, Docker, Kubernetes, Ansible, Git, and Terraform to automate deployments and enhance system reliability. Proven ability to lead teams, optimize cloud performance, and implement.

TECHNICAL SKILLS:

Operating System: **Linux (Ubuntu, Cent OS, Amazon Linux) Windows Server.**

Public Cloud: **AWS, Azure, GCP**

Configuration Management Tools: **Ansible, Terraform, Cloud Formation, AWS CDK.**

Infrastructure as Code (laC): **Terraform, Ansible, AWS CloudFormation, Azure, ARM.**

Containerization**: Docker, Kubernetes, Helm, Amazon ECS, Azure AKS.**

Source Code Management: **Git.**

CI/CD & GitOps: **Jenkins, GitHub Actions, Azure DevOps Pipelines, ArgoCD.**

Build tools**: Maven Deployment Tools/ Servers: Apache, Tomcat.**

Database: **MySQL, SQL Server 2012.**

NoSQL: **Dynamo D B (AWS).**

Atlassian tools: **JIRA.**

Repository Tools: **Nexus Artifactory, Docker Hub, Git Hub, ECR.**

Code Quality tool: **SonarQube, K6.**

Scripting: **Python, Shell Scripting, YAML, JSON, TypeScript.**

Security tools**: IAM, ACM.**

Monitoring/Logging tools**: Prometheus, Grafana, Azure Monitor, CloudWatch, ELK Stack.**

Other Tools & Platforms: **Linux, Git, Nexus, Docker Hub, Jira, SonarQube, K6, Splunk.**

CARRER SUMMARY:

Created infrastructure in a coded manner (Infrastructure as Code) using **Terraform** to create VPCs, subnets, NAT, EC2 instances, ELB and Security Groups.

Created infrastructure in a coded manner (Infrastructure as Code) using Ansible andTerraform for configuration management across **AWS, Azure,** and **GCP** Environments, enabling scalable, reusable, version-controlled deployments.

Secured application access using **Azure Active Directory and RBAC policies**

Have knowledge of structure provisioning using **Terraform**, including modules, workspaces, remote state, and multi-cloud automation.

Virtualized servers using **Docker** for test and dev environments with image optimization, container lifecycle management, and configuration automation using **Docker containers** across AWS, Azure workloads.

Used **Ansible** and **Terraform** for configuration management across **AWS, Azure** environments, enabling, Scalable, reusable, Version –Controlled deployments.

Have good knowledge of **Kubernetes** cluster setup, scaling, node management, deployment strategies, and maintenance across **EKS**, **AKS**,

Experience in developing Prometheus queries and **Grafana** dashboards targeted a t understanding application performance, observability, and capacity analysis in multi-cloud environments.

Implemented GitOps practices for **Kubernetes** using **ArgoCD** and Helm charts, enabling declarative, version-controlled, and auditable deployments for applications.

PROFESSIONAL EXPERIENCE:

ACCENTURE – Bengaluru
Sep 2024 - 27th Jan 2026
Cloud & DevOps Engineer

PROFESSIONAL PROJECTS:

PROJECT – 1

CIGNA – US

Experience working on cloud platforms such as **Azure** and **AWS**, utilizing services including **AWS IAM, VPC, EC2, ECS, EKS, EBS, RDS, S3, Lambda, ELB, Auto Scaling, Route 53, Cloud Front, Cloud Watch, Cloud Trail, SQS**, **SNS** and **Azure services such as Azure Virtual Machines, Azure Virtual Network, Azure Storage, Azure Functions, Azure Kubernetes Service (AKS), Azure Monitor,** and **Azure Active Directory.**

Designed and managed scalable cloud architectures using **Azure VM, Azure App Service, AKS, Azure SQL, VNet, and NSG,** ensuring secure, highly available, and cost-optimized deployments for enterprise applications

Provisioned and maintained **Linux (Ubuntu, Amazon Linux)** and **Windows Server** environments on **AWS**, **EC2**, with versioned **AMIs**, monitoring via **Cloud Watch**, **SNS**, and compliance with pharma change controls.

Automated infrastructure using **Terraform**, **AWS CDK,** and managed secure deployments of **ECZ, S3, RDS, ELB, Lambda, VPC ECS,** and**, IAM, Route 53** per regulatory standards.

Strengthened cloud security posture through **Azure AD**, **Conditional Access, MFA, RBAC, Managed Identities, Key Vault, PIM,** and **integrations** with application and infrastructure layers.

Built a security-focused Azure foundation using **Azure Policy** and Sentinel, Automating threat detection and reducing security **vulnerabilities by 60%** as Measured by quarterly penetration tests.

Implemented **Ansible** for configuration management and deployment automation across **Dev, QA, and Validated production** environments.

Migrated monolithic workloads to micro services architecture, leveraging **Docker**, **Kubernetes**, and **GitOps**, improving deployment frequency, scalability, and fault tolerance.

Analyzed client environments and implemented solutions using **AWS services, CI/CD pipelines, Git,** and **Dockers.**

Built and managed **Kubernetes clusters**, handling pod **orchestration, secrets, resource quotas**, and securing containerized pharma workloads.

Developed robust **CI/CD pipelines** in **Jenkins,** integrating **GitHub, SonarQube, Maven**, and unit testing for auditable and traceable software delivery.

Integrated **API Gateway** into **Terraform** workflows to automate secure, scalable microservices deployment with tagging and compliance guardrails.

Monitored systems using **CloudWatch**, **Prometheus**, and alert automation; implemented **Lambda**-based-triggers for backups, snapshots, and event-based workflows.

Managed **Amazon RDS (MySQL, SQL Server)** with automated backups, encryption, and compliance-aligned patching.

Delivered L1/L2 support, handled change requests, incidents, and audits per **SOPs, SLAs,** and **GxP/21 CFR Part 11.**

Developed automation scripts using **Shell, Python,** and **Typescript** for infrastructure tasks, data pipelines, and log parsing.

Deployed and maintained web applications on **Apache**, **Tomcat**, and **JBoss**, supporting **GMPcompliant** systems in R&D and manufacturing.

Collaborated with **QA, validation**, and **compliance** teams to align DevOps practices with regulatory frameworks and documentation standards.

PROJECT – 2
HCSC – Global

Designed and deployed **Cloud-native infrastructure** on **AWS**, implementing **3-tier architectures** using **ECZ, ALB/NLB, S3, EFS, RDS, Route 53, CloudFront, IAM**, and **VPC** with **subnet isolation** and **NAT gateways.**

Led implementation of **CI/CD pipelines using Jenkins, Git, Maven,** and **Ansible**, ensuring reliable, automated builds, testing, and deployments across multi-environment stacks (Dev, QA, UAT).

Developed and modularized **Ansible playbooks** and **roles** for infrastructure provisioning, configuration management, and application deployment, adhering to **infrastructure-as-code (laC)** best practices.

Automated provisioning and configuration of **AWS resources** using **Ansible modules**, ensuring repeatability, scalability, and compliance with cloud governance standards.

Configured and deployed **Apache Tomcat servers** via **Ansible**, including custom templating, versioned artifact deployment **(WAR/JAR),** and post-deployment validation hooks.

Built and managed **Docker containers** using optimized **Docker files**, deployed multi-container applications via **Docker Compose**, and maintained container lifecycle across environments.

Managed and secured **Git repositories,** implemented GitOps workflows, and enforced version control standards through branching strategies, tagging, and peer-reviewed pull requests.

Integrated **code quality and SAST tools** (e.g., **SonarQube**) into C I pipelines for early detection of code issues and technical debt.

Implemented and maintained **end-to-end release automation**, including artifact promotion, environment-specific configurations, and rollback mechanisms using Jenkins + Ansible.

Monitored application and infrastructure health using **AWS CloudWatch**, **Prometheus**, and alerting pipelines for proactive issue detection and system optimization.

Facilitated cross-functional collaboration between Dev, QA, and Ops teams, managing **release orchestration, issue triage**, and **incident resolution** to ensure SLA compliance.

Ensured application reliability through automated testing, deployment validation, and log analysis post-deployment.

Led process improvement initiatives to optimize CI/CD flows, reduce manual interventions, and scale delivery pipelines across teams and environments.

PROFESSIONAL EXPERIENCE:

WISEN INFOTECH PRIVATE LIMITED – Bengaluru
July 2022 - Sep 2024
Software Engineer

PROFESSIONAL PROJECTS:

GE - Healthcare

Designed and deployed scalable cloud infrastructure using **Microsoft Azure,** implementing **laaS**, **PaaS**, and **SaaS** solutions to support enterprise workloads.

Configured **Azure Virtual Networks (VNets), NGs**, and **VPN gateways** to enable secure hybrid connectivity across services and on-premises systems.

Managed **Azure Blob Storage, Azure SQL Databases,** and **Azure Functions** for serverless compute, optimizing performance, backup strategies, and cost-efficiency.

Developed and automated **CI/D pipelines** using **Azure DevOps** and **Jenkins**, integrating with **GitHub** and **Terraform** to enable rapid and reliable deployments.

Authored and managed **Terraform modules** and **YAML scripts** for Azure resource provisioning and Kubernetes deployment pipelines.

Created and maintained **Ansible playbooks**, roles, and vaults for environment setup, configuration and management, and application deployment.

Built and deployed **Docker containers**, implemented **microservices architecture**, and orchestrated workloads using **Kubernetes (AKS/Kops).**

Implemented proactive monitoring and alerting using **Azure Monitor, Prometheus,** and **Splunk** for performance tuning and issue resolution.

Deployed and managed foundational Azure resources, including **Virtual Machines, App Services,** and **Azure SQL Databases**, integrating with Azure Storage Blobs for structured data management.

Used **VI editor** and scripting (Bash, YAML) to automate infrastructure and deployment tasks.

Worked in **Agile/Scrum** environments using JIRA, collaborating across teams to reduce deployment time and improve DevOps maturity.

CERTIFIATION:

AWS Certified Cloud Practitioner.

EDUCATION:

BE - Mechanical Engineer - 2018 to 2021

Jonson's Institute Of technology – Coimbatore.

DME - Diploma in Mechanical Engineer - 2014 to 2017

Subramaniyan Polytechnic College – Pudukkottai.
